ABSTRACTED-PUB-NO: JP51144353A

BASIC-ABSTRACT: The lubricant is used in arc welding and electrogas welding Its pH is adjusted to 7.5-10.0. It contains 4-17 wt.% of emulsified sulphuric acid ester of high fatty acid and soap, alkali salt of higher fatty acid of >C8 resin acid or naphthenic acid alkali metal salt, alkylallylsulphonate, alkylphenol sulphonate etc. and the remainder water, and water insol. liquid e.g. higher fatty acid or higher alcohol >c8, having carboxyl - group or hydroxy group as hydrophilic gp.

Incorporating trace amt. of the lubricant agent on the surface of the welding wire helps to increase the feeding capacity, corrosion and rust prevention, and welding operation. Also a weld pt. of high quality contg. a decreased amt. of hydrogen is produced.

TIX:

Lubricant for welding wire - contg. emulsifier, water insoluble cpd. and water

ABTX:

The lubricant is used in arc welding and electrogas welding Its pH is adjusted to 7.5-10.0. It contains 4-17 wt.% of emulsified sulphuric acid ester of high

fatty acid and soap, alkali salt of higher fatty acid of >C8  
resin acid or  
naphthenic acid alkali metal salt, alkylallylsulphonate,  
alkylphenol sulphonate  
etc. and the remainder water, and water insol. liquid e.g. higher  
fatty acid or  
higher alcohol >c8, having carboxyl group or hydroxy group as  
hydrophilic gp.

ABTX:

Incorporating trace amt. of the lubricant agent on the surface of  
the welding  
wire helps to increase the feeding capacity, corrosion and rust  
prevention, and  
welding operation. Also a weld pt. of high quality contg. a  
decreased amt. of  
hydrogen is produced.
